

# Vision Statement

"Vision without action is a daydream. Action without vision is a nightmare."

- Japanese proverb.

A vision statement is a future, idealistic projection of an organization's long term desired state and accomplishments.

It is an aspirational description of the business, meant to inspire within the organization and energize its employees to take pride and contribute their best.

A well-conceived vision statement has significant impact on a company's long-term success and even its bottom line.

It is the foundation for a consensus on an organization's future  
It guides the strategic direction toward future accomplishments and success  
Provides guidance and inspiration through the prospect of growth and achievement.

Let's craft a statement that synthesizes your ambition and mobilizes your staff!
